

March 12, 2003

Dear «FirstName»:

We would like to say *thank you* for participating in the Source Water Assessment Program as a Land Use Inventory volunteer. As we have mentioned before, your work is very important to the State of Rhode Island and to your community.

The efforts you have made to collect up-to-date land use information within the designated wellhead and/or watershed protection areas will be a valuable contribution to the risk assessment process. The first, introductory Assessment work session was held on April 11th. The remaining Assessment work sessions will be held on May 30th and June 27th, both from 4—6 PM at the North Kingstown Free Library.

Once the Source Water Assessment has been completed, the results will be summarized and presented to the communities involved. We will notify you when the results are finalized and hope that, with your voice, the information is used to compliment existing water quality protection efforts and generate additional education and awareness within your community.

Thanks again, «FirstName», for all of the time and detail that you put into this project. We've enclosed a Home*A*Syst Handbook as a token of our appreciation.

Very Truly Yours,

Alyson McCann
Water Quality Program Coordinator

Holly K. Burdett
Home*A*Syst Program Assistant
