

Meeting Notice

Rhode Island Source Water Assessment Program:
Providence Water Supply Board, Scituate Reservoir

Assessment Meeting 1:

***Review of Existing Data, Issues of Concern
& Watershed "Health Indicators"***

Thursday, December 12, 2002 from 4:00 to 6:00 p.m.

North Scituate Community House, 546 West Greenville Road (Rte. 116), North Scituate, RI

- > View maps of water resources, land use/land cover, soils, point sources of pollution (where available) and other high-intensity land uses.
- > Review additional information on watershed "health indicators" such as nonpoint source pollution entering surface and ground water, the extent and effects of impervious surface area on water resources, and natural landscape features that can attenuate pollutants.
- > Discuss land use scenarios and best management practices to include in our computer model for the second assessment workshop.

Second Assessment Group Meeting:

***Management Practices &
Modeling Results***

Monday, January 13, 2003 from 4:00 to 6:00 p.m.

North Scituate Community House, 546 West Greenville Road (Rte. 116), North Scituate, RI

The second assessment meeting will focus on strategies to enhance source water protection.

- > Examine computer assessment results of selected best management practices
- > Discuss management options, recommendations, and outreach strategies to enhance source water protection.
