

Plant Adaptations

see the next page for the student version of this classroom aid

Some plants have special adaptations that allow them to survive in different environments. Draw a line to match the adaptation with the right plant!

Cactus

Conifer

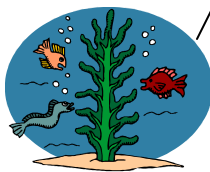

Grape Vine

Venus Fly Trap

Dandelion

Seaweed

grows under water

has spines for protection

very long stems can climb and cling to trees

seeds are spread by the wind

catches bugs for food

seeds are found in pine cones

Name: _____

Plant Adaptations

Some plants have special adaptations that allow them to survive in different environments. Draw a line to match the adaptation with the right plant!

Cactus

grows
under water 

Conifer

has spines for
protection 

Grape Vine

very long stems
can climb and
cling to trees 

Venus Fly Trap

seeds are
spread by
the wind 

Dandelion

catches bugs
for food 

Seaweed

seeds are
found in
pine cones
