

HRP Associates, Inc.

HRP Associates, Inc. currently has openings for the following positions in our various offices:

CONNECTICUT - FARMINGTON

Environmental Compliance Specialist

HRP Associates, Inc. is seeking a number of individuals with 2-5 years of experience in environmental compliance and environmental management systems. Projects vary from compliance auditing, permit and spill control plan preparation to industrial hygiene testing and implementation of environmental management systems for our corporate and college clients. The successful candidate will possess a BS degree in environmental engineering or related field. Individual must have good oral and written communication skills and be proficient in MS Office products. Experience with ISO14000 environmental management systems training, preparation and/or implementation is a plus.

Civil Engineer/Remediation Construction/P.E.

HRP Associates, Inc. is seeking mid-level candidates with 3-5 years of experience to conduct site development engineering, site design, storm water/site planning skills and construction management on a wide variety of challenging projects. Assignments will include preparation of plans and specifications for various types of construction and environmental remediation projects, field supervision of remediation construction, interaction with design professionals and contractors, grading, drainage, and water and sewer design. Candidates should possess a Bachelors Degree from an accredited Civil Engineering program and strong oral/written communication skills. Experience in environmental management and/or site development, hydrologic/hydraulic computer programs and AutoCad/Landesk for site planning and quantity estimating is desirable. An ability to obtain a P.E. within 2-3 years is preferred.

Remediation Professionals

HRP Associates, Inc. is seeking professionals with a minimum 2-5 years experience in the application of soil and groundwater remediation technologies to support existing projects and growing opportunities in our Farmington corporate office. We are searching for creative team players with demonstrated experience in multiple remedial technologies applied in varying geologic conditions. Specifically, experience with the application of in-situ techniques, including chemical oxidation, enhanced biodegradation, and/or multiple phase contaminant extraction is required. Demonstrated aptitude in all aspects of these technologies, including assessment, design, pilot testing, implementation, and optimization is preferred. Successful candidates will need to work both independently, and also within a friendly, experienced multi-discipline team. Strong verbal and written communication skills are a must. A BS in geology, engineering, hydrogeology, or chemistry, as well as curiosity and the drive to keep learning, is required. An advanced degree is a plus.

Asbestos Monitor

HRP Associates, Inc. is seeking an experienced Asbestos Project Monitor to join our active asbestos group to assist in HRP's industrial lead abatement and asbestos projects. The successful candidate will have a BS degree in a relative science or engineering field and 1-3 years experience. Certifications as an Asbestos Inspector and Project Monitor, as well as OSHA 40 hour HAZWOPER training and certifications in lead based paint, mold and indoor air quality, is preferred. Job duties will include monitoring hazardous materials abatement operations, ensuring compliance with approved work practices, conducting lead and asbestos sampling, recording field data, maintaining accurate field notes, data compilation and interpretation, performing measurements and calculations, preparing daily reports, project specifications, and technical deliverables.

Geologists and Engineers

HRP Associates, Inc. is seeking experienced geologists, engineers and hydrogeologists with a minimum of 2-5 years experience to join our corporate office. We are looking for individuals who are creative and results oriented with strong backgrounds in geology, hydrogeology, geochemistry, environmental science, engineering, or related fields. A variety of challenging assignments will be offered to successful candidates, including the design and execution of hydrogeological investigations, remedial actions, and environmental assessments. Responsibilities will include field team supervision, data analysis and interpretation, report preparation, budget development, and client interaction. Candidates should possess

HRP Associates, Inc.

a BS or MS, demonstrate strong written and verbal communication skills, and be proficient in MS Office products. This is an opportunity for self motivated professionals interested in a career, not simply a "position", in a fast-paced and flexible work environment. Applicants need to be capable of working both independently and in a team setting in a manner which is fully supportive of our clients, as well as other employees. Working knowledge of Connecticut environmental regulations, including the Connecticut Remediation Standard Regulation, as well as an understanding of Connecticut geology is a plus.

Project Geologists/Senior Geologists

HRP Associates, Inc. has positions available for experienced Geologists and Hydrogeologists or related science/engineering fields with 1-3 years experience. Areas to be involved with include: site development, RCRA, CERCLA, environmental site assessments, due diligence, site subsurface investigations, site groundwater/soil remediation, and various site remediation technologies. Experience with chemical oxidation a plus. Responsibilities will include field work, data analysis, report writing and client interaction. Candidates should hold a BS/MS, demonstrate strong written and verbal communication skills, and be proficient in MS Office products.

NEW YORK - MALTA

Project Geologists/Senior Geologists

HRP Associates, Inc. has positions available for experienced Geologists and Hydrogeologists or related science/engineering fields with 1-7 years experience. Areas to be involved with include: site development, RCRA, CERCLA, environmental site assessments, due diligence, site subsurface investigations, site groundwater/soil remediation, and various site remediation technologies. Experience with chemical oxidation a plus. Responsibilities will include field work, data analysis, report writing and client interaction. Candidates should hold a BS/MS, demonstrate strong written and verbal communication skills, and be proficient in MS Office products.

Administrative Assistant

HRP Associates, Inc. is seeking an administrative assistant for our Malta, NY regional office. We are looking for someone to manage our various administrative functions related to the environmental engineering services we provide to our clients, including word processing (65+ WPM), preparation of marketing support materials, client interaction, electronic filing, document assembly, etc. The ideal candidate will possess an understanding of environmental engineering support services, have strong organizational skills, be able to work independently and multi task, display excellent verbal and written communication skills, and enjoy working in a fast-paced, collegiate working environment. Fluency in all relevant MS Office applications (Word, Excel, PowerPoint, Access) and Adobe Acrobat is a requirement.

SOUTH CAROLINA - GREENVILLE

Environmental Compliance Specialist

HRP Associates, Inc. is seeking individuals with 0-2 years of experience in environmental compliance and environmental management systems. Projects vary from compliance auditing, permit and spill control plan preparation to industrial hygiene testing and implementation of environmental management systems for our corporate and college clients. The successful candidate will possess a BS degree in environmental engineering or related field. Individual must have good oral and written communication skills and be proficient in MS Office products. Experience with ISO14000 environmental management systems training, preparation and/or implementation is a plus.

FLORIDA - TAMPA

Project Geologist/Scientist

ABOUT HRP ASSOCIATES, INC.

HRP Associates, Inc. is a full-service environmental consulting firm initially incorporated in Connecticut in 1982. The three original partners founded the business on the principles of providing a diverse portfolio of clients with exceptional service by developing and retaining a highly educated, well compensated and loyal staff that performs well in a challenging yet flexible working environment. Those principles have fostered the growth of a company that today consists of over 85 technical and support staff distributed in six offices in Farmington, CT; Fairfield, CT; Tampa, FL; Indianapolis, IN; Malta, NY; and Greenville, SC. Our ability to motivate, reward and retain employees is evidenced by the fact that we have over 40 employees with more than ten years of service with HRP. Nearly 20% of our staff has been with us for 20 years! Services provided by HRP span the globe as well as the spectrum of environmental consulting and civil engineering disciplines. We have served over 5,000 industrial, government, and private sector clients in 32 states and 11 countries!

HRP Associates, Inc. offers competitive salaries and excellent benefits to qualified employees including: medical, dental, vision, life, and disability insurance coverage; company-sponsored profit sharing pension plan; voluntary 401k plan; paid holidays and vacations; flex time; paid overtime; and professional development/continuing education reimbursement. HRP is an EOE. Visit www.hrpassociates.com to find more information about our exciting company!
