

People Soft Supported Client Hardware/OS/ Browser Matrix

Staff members with any other combination of Platform/OS Level/Browser Levels than what is in the matrix below may experience some compatibility issues with existing PeopleSoft Application at the University. For example, Firefox 4 and 5 have not been certified for PeopleSoft yet many staff members will upgrade because it is being pushed. It may be advisable to have two browsers on clients desktop, for example Safari and Firefox to build in backward compatibility issues with future patch levels of the People Soft Application.

Please **DO NOT update** your Web Browser before discussing with your Department Manager or Information Technologist. Only download browsers that have a “Supported” Status.

UCS strongly recommends that each PeopleSoft customers have two different browsers on their desktop for PeopleSoft application.

Mac users should have Safari and Fire Fox

PC clients should have Firefox and IE.

Platform Version	Support Version	Support Status
	Safari 5	
Apple Mac OS X (Intel) 10.5	Safari 5	Supported
Apple Mac OS X (Intel) 10.6	Safari 5	Supported
	Safari 4
