International Engineering Program House Statement of Purpose

The IEP & TI Houses are the administrative and residential center founded to support the goals and activities of the International Engineering Program. It is a home for students, from the U. S. and abroad, seeking to prepare themselves for leadership careers in the contemporary global workplace. It provides a partnership among faculty, students, and all persons in the public and private sectors who are committed to the goals of a global technical education.

The IEP & TI Houses are a model for responsible residential living, based on the philosophy that students with similar academic and career goals, regardless of their national background, race, or creed, will be supportive of each other and benefit mutually in a common living environment.

A model for interaction between higher education and practitioners in the global workplace, the International Engineering Program was established in response to the needs of a changing world. The IEP & TI Houses exemplify the manner in which educators and members of the private sector may work together in supporting young persons preparing for a complex world.
