URI Pharmaceutical Sciences Graduate Program

The college offers M.S. and Ph.D. level degrees in Pharmaceutical Sciences with specializations in: Medicinal Chemistry and Pharmacognosy, Pharmaceutics and Pharmacokinetics, Pharmacoepidemiology and Pharmacoeconomics and Pharmacology and Toxicology.

New Home for the College Scheduled for Completion Early 2012

The new, 150,000 sqft, \$75 million, facility will provide modern classrooms, well equipped laboratories and comfortable meeting spaces to support student learning and experiences.

Research facility highlights

- Eighteen 1,350 sqft Research modules (Biology / Chemistry / Pharmaceutics)
- 3,000 sqft Analytical Instrumentation Facility
- 7,000 sqft cGMP Facility
- 1,000 sqft NMR Facility
- Access to computer facilities and population-based databases for pharmacoepidemiology research.
- Extensive use of advanced green technologies to minimize energy consumption

Why should you choose the University of Rhode Island College of Pharmacy for your graduate education?

- We have a world renowned group of researchers in basic, clinical and applied areas of research, exemplifying basic and translational research within our own college.
- We have a diverse group of faculty and students and are committed to attracting the best graduate students nationally and internationally.
- Our faculty are passionate about teaching, research and mentoring. Our graduate program and our graduate students are an integral part of our college.
- The University has made a nearly \$500 million investment in the newly developed North district, including \$75 million for our new College of Pharmacy. In addition to exemplary faculty, we have state of the art teaching and research facilities.
- We value and are committed to training the next generation of scientists and academicians.
