

Diabetes Outpatient Education Center of Greater New Bedford
New Bedford Medical Associates

As the Program Coordinator for the NBMA Diabetes Education Program I work under the supervision of Dr. Ronald Bogusky at his office located at 368 Faunce Corner Road in North Dartmouth. His office provides me with ample space to teach group classes of approximately ten patients. At this location, I am provided with an office allowing me to meet with individuals in private, while class is taking place, if necessary. Classes are held on Thursday from 9-11 AM and 5-7 PM.

To serve NBMA patients in other areas of the community I also offer education classes in Wareham, MA, and Swansea, MA. Our location in Swansea is part of the Swansea Family Practice Group, a division of NBMA. At their facility at 440 Swansea Mall Drive, I utilize their conference room at the back of the building for diabetes education classes. This area provides space to accommodate ten patients for group education. I also use this space to interview patients one on one for an initial assessment of their educational needs. Classes are held on Wednesdays, 5-7 PM.

Dr. Brian Fitzpatrick's office at 332 Main Street in Wareham provides a classroom for my diabetes education classes. Dr. Fitzpatrick practices family medicine in the community and his office provides space to teach a group of six to eight patients. This space also provides an area to interview patients individually for an initial assessment of their educational needs. Classes are held on Tuesdays, 9-11 AM and 5-7 PM.
