PHC 594 Pharmacoepidemiology

Description

Management of a publicly funded prescription drug benefit: The RI Medicaid Program.

In this rotation, students will assist R.I. Medicaid program administrators in ongoing efforts to improve the utilization of pharmaceuticals among program enrollees. Rotations will be project-based, potentially involving the development and/or implementation of prior authorization programs, creation of tools to guide prescribing and medication management, or the development of assessment strategies and interventions which support the efforts of the Rhode Island Drug Utilization Review board.
