

Rotation: Advanced Inpatient Medicine (PHP 592)

Site: Greenwich Hospital, Greenwich, CT

Preceptor: Robert W. Rosum, R.Ph., M.S.

Rotation description: The diagnosis, treatment, and management of different medical disorders will be explored in the acute hospital patient care setting. The student will do clinical rounding with the medical teams in General Medicine, including an attending physician, resident physician, interns and physician associate. The student will be part of clinical discussions, monitor patients and develop a pharmacist's care plan. Emphasis will include health care needs of the patient, pharmacotherapeutic goals, as well as recommendations for therapy and monitoring parameters. The student will be active in the geriatric assessment of both inpatient and ambulatory patients as well as involved in the Pharmacology Consultation Service.

Housing: Housing is available near the hospital for the duration of the rotation.
