

Master Plan Review Team
August 29, 2002
Graduate School of Oceanography
Narragansett Bay Campus

Attendees: Kathy Mallon, Jeff Callahan, Anna Prager, Will Green, Sandy Taylor, Rick Rhodes, Steve Lysik, David Block, Jerry Sidio

Our host for the meeting was Dean David Farmer. After a brief welcome, he asked Jeff Callahan to do a short presentation on the 2000 Master Plan for the Narragansett Bay campus which was done by Goody Clancy and Associates. Following that presentation there was a discussion with the dean about the importance of using the context of the master plan for upcoming capital projects.

Anna Prager moved and David Block seconded a formal motion to urge the administration to extend the sign resurfacing program implemented on the main campus to the Bay Campus. There was unanimous support for the motion.

SPIR will see if there are any more copies of the Bay Campus master plans for the MPRT members who do not have one. Since the next large capital project on campus will be the Pell Library, the committee urged the Dean to work with the master plan concepts that recommended using the Library renovation project to create a new campus center. SPIR is available to work with GSO on campus master plan issues.
